

## Set For Saunas

TEMPO presents the new and only set for saunas and steam baths. Thanks to the deep anodizing treatment, the hinges warranty high performance against corrosion. They are also particularly suitable for applications in presence of high temperature, therefore suggested for saunas and steam baths. Also the closing speed is adjustable with the hinges in the set.

The set is combined of two hinges and one knob. As cabins are usually equipped with appropriate seals made of wood, no profile is foreseen in the set.

## Complete Set For Saunas

Complete set for steam bath consists of two hinges and profiles. The profiles are specially designed to avoid steam runoff. In this set the knob is optional at complete discretion of the customer.
